Introduction and Purpose of the Plan

Mission Statement

To coordinate the human service transportation efforts of public, private and non-profit providers in an effort to maximize services for the populations served in HSTP Region 11 and to provide guidance concerning funding and available resources.

Role of the Plan

In 2005 the United States Congress enacted the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU). This act provided funding for various transportation projects including highway construction, mass transit, and human services transportation. Among its provisions, SAFETEA-LU legislation required that all requests for funding through three federal programs; Elderly Individuals and Individuals with Disabilities (Section 5310), Job Access and Reverse Commute (JARC, Section 5316), and New Freedom (Section 5317) be derived from a locally developed Coordinated Public Transit-Human Services Transportation Plan (HSTP). A coordinated plan should maximize the programs' collective coverage by minimizing duplication of services. Further, a coordinated plan should be developed through a process that includes representatives of public, private and non-profit transportation and human services providers, and the public. A coordinated plan may incorporate activities offered under other programs sponsored by Federal, State, and local agencies to greatly strengthen its impact. The Federal Transit Administration (FTA) also encourages participation in coordinated service delivery as long as the coordinated services will continue to meet the purposes of all programs.

Plan Updates

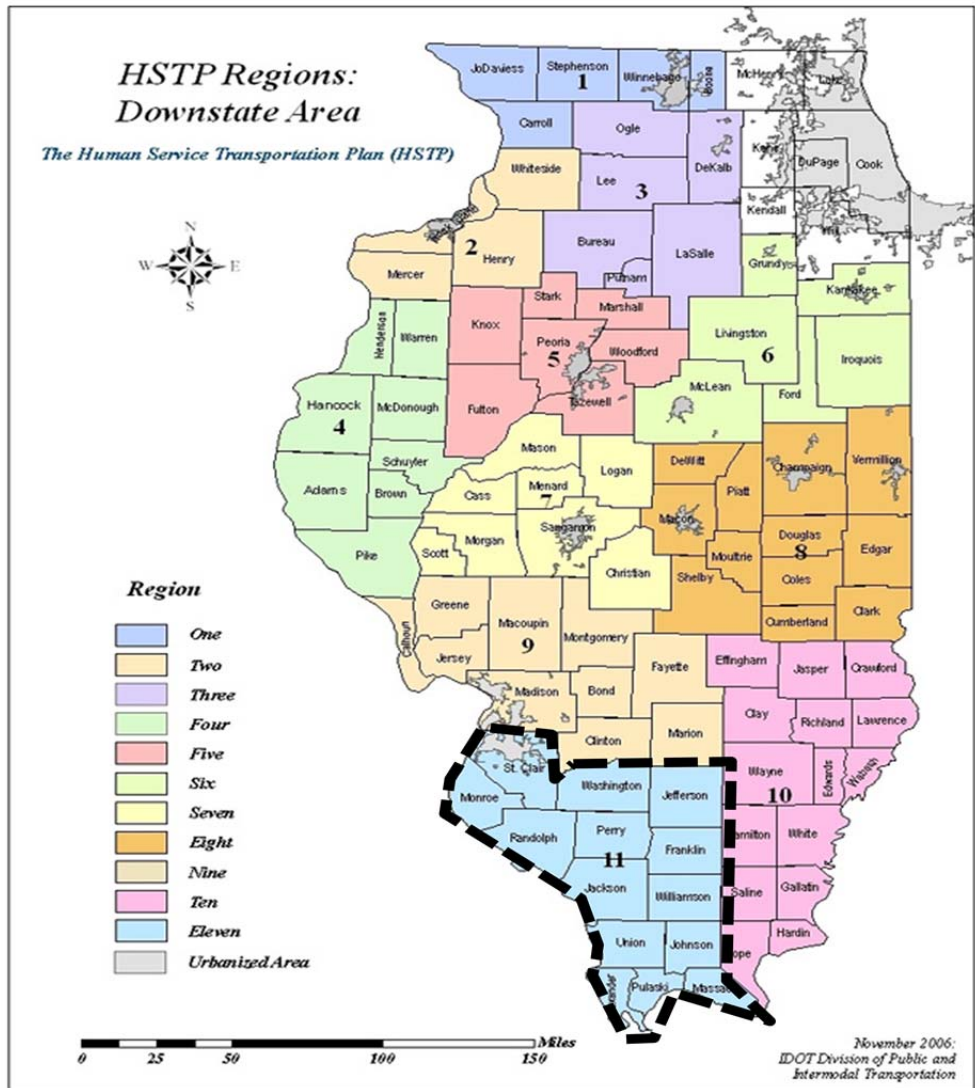

Any further updates to this planning document will be determined and generated by the Regional Transportation Committee and input from the Illinois Department of Transportation – Division of Public and Intermodal Transportation.

Regional Description

Region 11 is one of eleven downstate Human Services Transportation Planning Regions established by the State of Illinois through DPITS. The region is comprised of 14 counties located along the western half of Southern Illinois, stretching from the Mississippi River to the middle of the state. The region contains the counties immediately to the east and south of the Metropolitan St. Louis (or "Metro East") Region. These counties are: St. Clair, Washington, Jefferson, Monroe, Randolph, Perry, Franklin, Jackson, Williamson, Union, Johnson, Alexander, Pulaski and Massac. Of the estimated 638,736 residents of Region 11, about 42% (270,056) live in St. Clair County, many of whom fall under the direction of the East-West Gateway Council of Governments metropolitan transportation plan.

In 2010, the U.S. Census designated 36 new Urbanized Areas in the United States including two affecting southern Illinois communities, one is located along the Route 13 Corridor which has a population of 67,821, and a second which is centered in Cape Girardeau, Missouri that includes parts of East Cape Girardeau in Illinois and has a total population of 52,900.

Region 11 is rural in character except for these urbanized areas, and thus is subject to rural transportation planning.

Regional Transportation Committee (RTC) Make-Up

The Regional Transportation Committee is meant to provide input and to oversee and promote the coordination efforts of the Human Services Transportation Coordinators and is required by the legislative act SAFTEA-LU. The committee is further tasked with reviewing and recommending applications for Section 5310 (Consolidated Vehicle Program\CVP) funding. Their role is vital to insure that the planning process is reflective of the needs of local transit operators and the general public. Ideal membership as set forth by the committee bylaws of 2012\2013 includes 1) any interested party of local county government, 2) not-for-profit Human Service organizations representing special needs, aging, disabled, workforce and

education, 3) public or private transit providers. Bylaws and Committee roles are available in the appendix.

Stakeholders

In Region 11, as well as other HSTP regions, there is still little involvement by the general public. To date the focus has been on maintaining support for the HSTC process and trying to identify stakeholders to discuss current and continuing issues with transportation. An introductory letter was sent out to a variety of stakeholders in July of 2007. All or most recipients of these introductory letters have also been sent notices for each of the HSTC meetings held to date. During HSTC meetings attendees are asked to provide contact information for any additional agencies or individuals who might be interested in participating in the HSTC planning process.

Meetings

The HSTC “Kick off” Meeting was held in Ullin, Illinois at the Shawnee Community College on October 16, 2007. Attendees were given an overview of what “Human Services Transportation” entails, what the role of the HSTP Coordinator is, what the composition and role of the regional committee will be, and an overview of the programs that the HSTC would be responsible for administering.

Currently, meetings are held quarterly, open to the public and are hosted in a different county within the Region. Special meetings may be scheduled on an ‘as needed’ basis.

Inventory

Profile of Service Providers

Information in the following list of providers for Region 11 was compiled based on surveys sent to area providers in 2014. Provider information, such as vehicle inventory will be updated annually as new surveys will be disbursed.

<i>Bethany Place</i> <i>821 West A</i> <i>Belleville, Il. 62220</i>
Provider Type: Client based services
Vehicles: Raised Roof or Minivans-1 Total Fleet: 1
Service Area: Primarily St. Clair & Madison Counties. Also serving Monroe, Clinton, Washington, Randolph, Bond, Calhoun, Jersey, Macoupin, , Fayette, Marion & Counties
Service Level: Curb to Curb or Door to Door as needed
Advance Notice Required: None
Basic Fare: None
Service Hours: 8am to 4:30pm Monday-Friday
Route Scheduling/Dispatch Method Written manifests
Communication System: Cell phones
Annual Trips: 6,000

Challenge Unlimited 4 Emmie Kaus Lane Alton, IL 62002
Provider Type: Provide transportation for clients that have developmental disabilities
Vehicles: Medium Duty-7 Super Medium-5 Total Fleet: 12
Service Area: Madison, St. Clair, Calhoun, Jersey and Clinton Counties
Service Level: Curb to Curb
Advance Notice Required: Fixed routes for agency clients
Basic Fare: none
Service Hours: 6am to 9:30am & 1pm to 4:30pm Monday-Friday
Route Scheduling/Dispatch Method: Manager schedules & handles manifests
Communication System: Radios
Annual Trips: 103,776

Comprehensive Connections 16338 N. Il. Highway 37 Mt. Vernon, Il. 62864
Provider Type: Client based & Sr. Citizens
Vehicles: Raised Rood or Minivans-10 (inaccessible) Other-9 (cars) Total Fleet: 19
Service Area: Jefferson Co.
Service Level: Door to door

Basic Fare: Suggested Donation

Service Hours: 8:00am-3:00pm Okawville Senior Center

9:00am-1:00pm Nashville Senior Center

Route Scheduling/Dispatch Method: Computerized

Annual Trips: 2,295

Levels of Participation

As part of the application endorsement process, agencies applying for various IDOT funds must participate in the Regional Committee meetings, as a coordinating entity, throughout the year. There are various levels of participation that an agency can achieve. This level system will be used by the HSTP Committee & the HSTP Coordinators when evaluating and scoring applications. Each agency applying for funds is to be scored during the evaluation process accordingly with the highest possible score to be awarded the highest level of participation. Agencies designated as Inactive will be removed from consideration for funding.

Leadership Participant- An agency that routinely volunteers leadership, data, and resources for coordination planning and service provision and attends all quarterly HSTP Committee meetings.

Active Participant- An agency that routinely fulfills committee requests for data, information and resources in the development of strategy planning and attends all quarterly HSTP Committee meetings.

Participant- An agency that only attends planning meetings, regularly.

Inactive-An agency that does not currently participate in meetings, planning, or service provision.

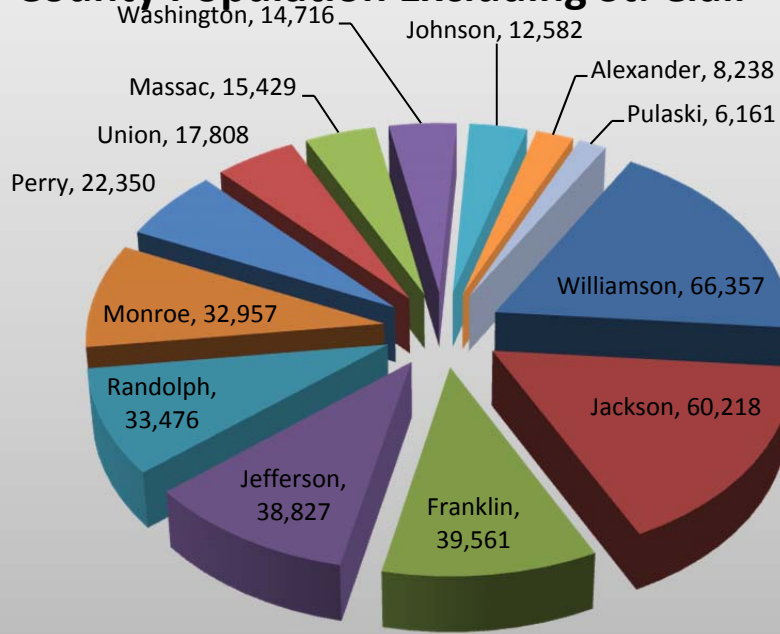

Needs Assessment

The Needs Assessment section addresses the demands for transportation services within the region. This includes an analysis of where populations that typically use transportation services are clustered, and the trip generators, which attract transportation users, that are found within the region.

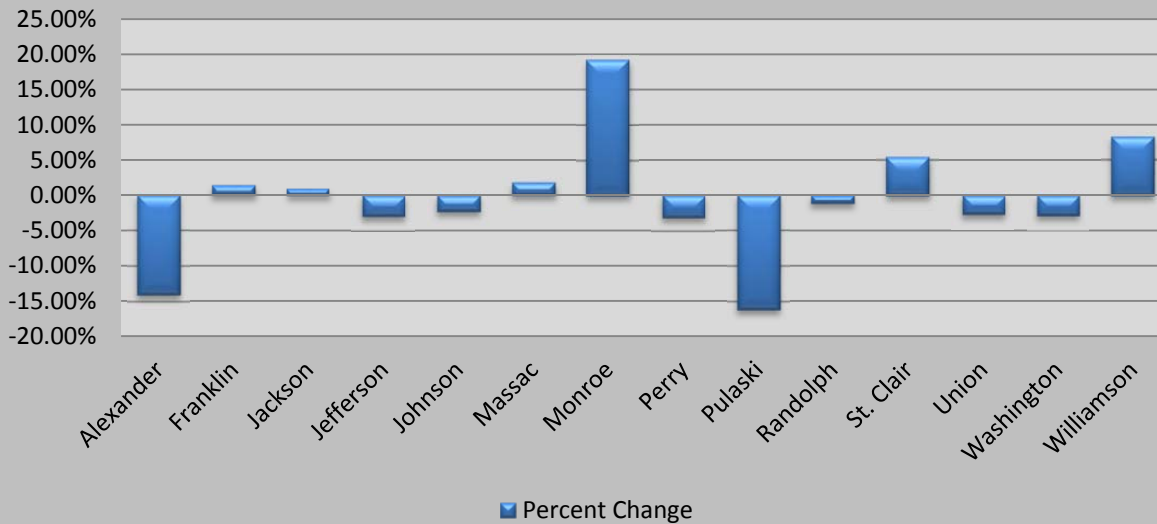

Demographic Analysis

Based on 2010 population data, since 2000 the population of Illinois has grown only 3.3% while data shows Region 11's population has decreased by -8.3%, possibly due to the massive flooding in the southern portion in recent years. Monroe County has seen the most growth at 19.3%, likely due to urban expansion from the metro St. Louis area. 6 Counties in Region 11 show growth while 8 counties are estimated to have lost population from 2000-2010.

County Population Excluding St. Clair

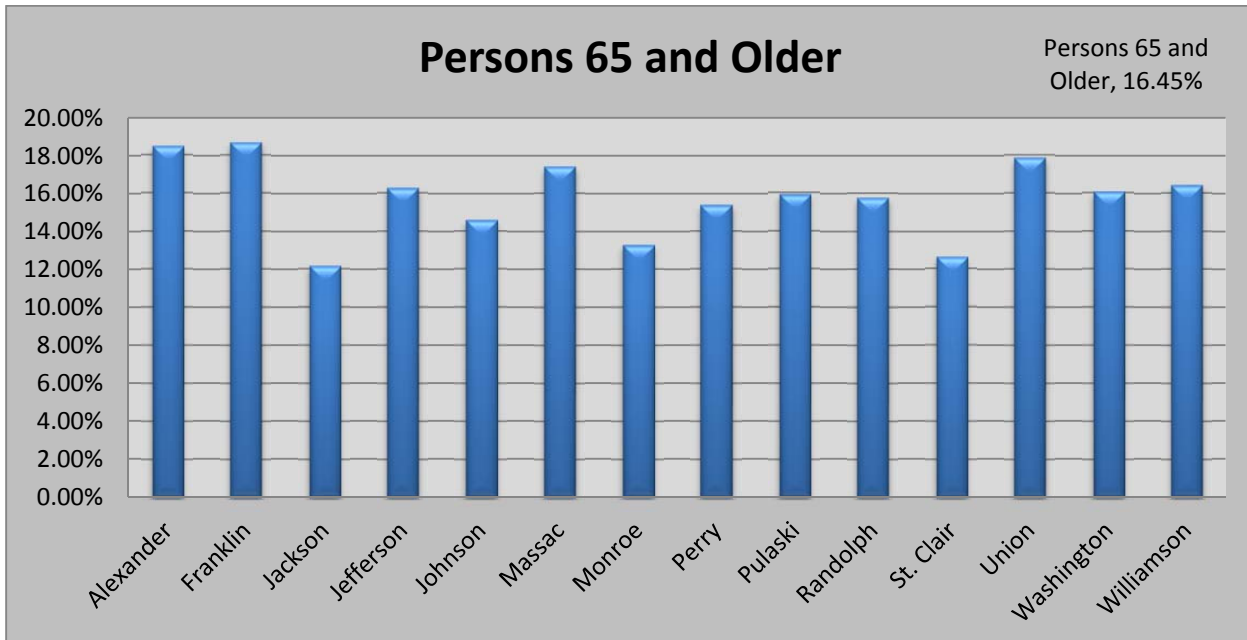

Region 11 Population Change From 2000-2010

Source: 2010 U.S. Census

Age

Region 11, like many rural areas of the state has an aging population that has an increasing need of transportation for medical appointments, shopping, and service trips. Without public transportation many elderly would not have access to hospitals, doctors, dialysis, counseling, senior centers, or DHS offices in the area (see trip generators).

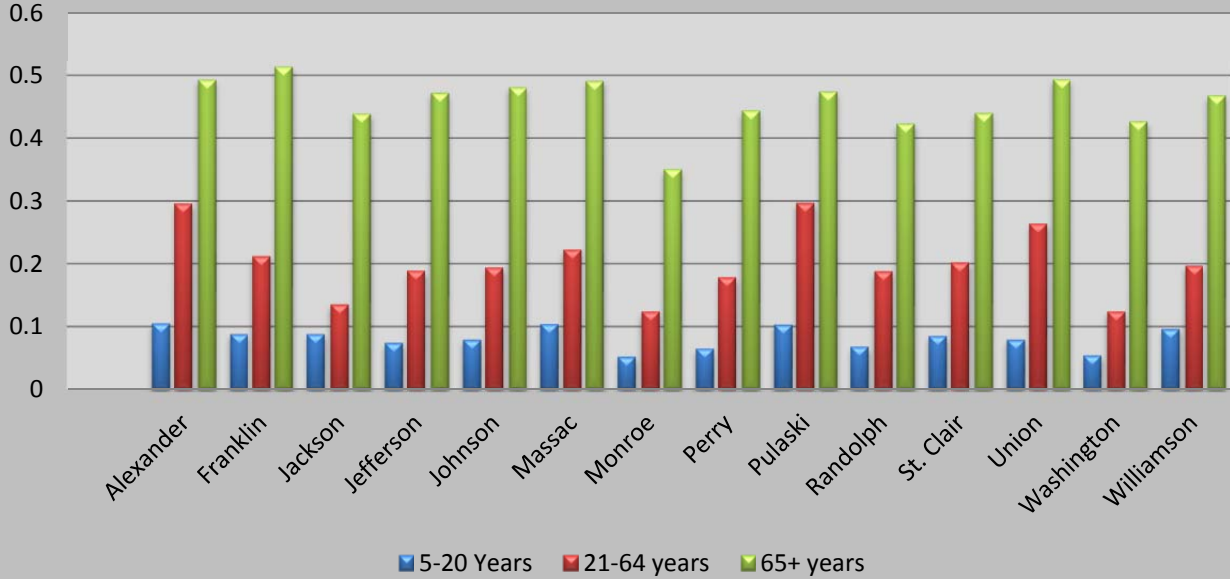

Source: 2010 U.S. Census

Disability & Poverty

It appears that the 2010 U.S. Census data shows that the counties with the highest percent of persons with disabilities are the three most southern counties; Alexander, Massac, and Pulaski. These counties experienced the worst flooding in recent years and are also stricken by poverty. The charts below and to the right show that Alexander and Pulaski has two of the three highest poverty rates in the region. It is imperative that these counties that suffer from poverty and high disability rates receive affordable public transportation specifically for medical appointments.

	5-20 Years	21-64 years	65+ years
County	Percent Disabled	Percent Disabled	Percent Disabled
Alexander	10.60%	29.70%	49.40%
Franklin	8.90%	21.30%	51.50%
Jackson	8.90%	13.60%	44.00%
Jefferson	7.50%	19%	47.30%
Johnson	8.00%	19.50%	48.20%
Massac	10.50%	22.35%	49.20%
Monroe	5.30%	12.50%	35.15%
Perry	6.60%	17.95%	44.50%
Pulaski	10.40%	29.80%	47.50%
Randolph	6.90%	18.90%	42.40%
St. Clair	8.60%	20.30%	44.10%
Union	8.00%	26.50%	49.45%
Washington	5.50%	12.50%	42.76%
Williamson	9.70%	19.80%	46.90%

Kenneth Hall Regional Hospital, East St. Louis	Touchette Regional Hospital, Centerville
Memorial Hospital, Belleville	Lindenwood College, Belleville
St. Elizabeth's Hospital, Belleville	McKendree University, Lebanon
Southwest Illinois College, Belleville	County Court and services, Belleville

Clusters of Shopping and medical services in the Metro East area
Regional Travel via IL State Routes 3, 4, 13, 15, 158, 157, 159, 161, 177, 203 US Routes 40, 50,
Interstates 64, 70 and 255
Population clusters include: Washington Park, Brooklyn, Caseyville, Cahokia, Centerville, East St.
Louis, Fairview Heights, O'Fallon, Dupou, Columbia, Millstadt, Smithton, Belleville, Swansea,
Shiloh, Freeburg, New Athens, Lebanon, Scott Air Force Base, Mascoutah, St. Libory, Lenzburg,
and Marissa

Coordination Gaps

Gap: Lack of coordination among transit and service providers

Goal: Increase coordination through communication, vehicle sharing, service contracts and a common fare structure

Strategy: Utilize the social media sites, increase vehicle sharing, and service providers will become educated on service contracts and develop contracts

There are varying levels of coordination including communication, resource sharing, and system consolidation. Many agencies have difficulty with this because it may mean a loss of autonomy, territory, or control. Other barriers to coordination include funding or regulation differences, political or geographic boundaries, or even perceived service constraints. Agencies should always start with communication and seek a coordination solution that fits well with all stakeholders involved. Service contracts are a method of coordination that ensures services are provided within terms that everyone agrees upon without ongoing service duplication. The key element is to increase participation and encourage learning activities at Committee meetings to better understand these options.

Increase HSTP Participation	
Action	Agencies who wish to access federal transportation dollars, or who have a need to provide transportation for clients should attend and participate in HSTC meetings and give input into the HSTP planning process.
Roles	<p><i>Transportation Providers:</i> Invite other service providers and human service agencies within service area to meetings.</p> <p><i>Human Services Transportation Committee:</i> Suggest potential gaps in services to the coordinators, contact individuals or agencies that might be willing to serve on the HSTC.</p> <p><i>HSTP Coordinators:</i> Continue to send invitations to meetings to identified stakeholders, work with existing contacts to identify potential new members.</p>
Timeframe	Ongoing
Priority	High
Cost	Minimal
Funding Sources	Already programmed within coordinator budget
Considerations	Increased participation in the Regional Transportation Committee is a key priority for the region. Gaps in representation need to be addressed. It is hoped that greater participation in the HSTC will lead to a better environment for coordination and ideas for future projects would be brought forward.

Coordination Services	
Action	May include but not limited to the following; Sharing vehicles, agreeing to pick up excess demand from other providers during off-peak hours, utilizing service contracts to provide transportation, develop a ride sharing program where providers will agree to complete trips from other providers which are along the same route as existing service and combined dispatch centers, establishing a common fare structure for riders that are in a ride share program, allowing multiple agencies to coordinate transportation and share the expenses associated with intelligent transportation systems (ITS).
Roles	<i>Transportation Providers:</i> Participation at all levels <i>Human Services Transportation Committee:</i> Identifying where these efforts could be implemented and encourage the efforts <i>HSTP Coordinators:</i> Support providers and be a resource
Timeframe	Ongoing
Priority	High
Cost	Variable based on project
Funding Sources	5310
Considerations	Coordination doesn't necessarily mean following one particular path, it does mean having providers come together and discuss what options might exist to reduce costs, increase the number of trips that can be completed, increase efficiency so that limited dollars can do more, and improve the quality of life for those who are served by transportation, and those who are currently unable to be served.

Development of Service Contracts between Public and Private Partners	
Action	For niche providers to be able to show cost savings on contracts
Roles	<i>Transportation Providers:</i> To obtain routes when feasible for both transportation partners <i>Human Services Transportation Committee:</i> Provide information on possible service contacting by community involvement and networking. <i>HSTP Coordinators:</i> Potential link between transportation providers and provider partners to educate on cost savings of service and potential of contracts.
Timeframe	Ongoing
Priority	Medium
Cost	Depending on existing levels of services, additional capital and operational funds may be needed.
Funding Sources	Development of service contracts will build local-match dollars for transportation providers.
Considerations	For niche providers to take into account that transportation service contracts usually save DHS providers money

Develop Partnerships to Share Vehicles	
Action	Develop possibilities and avenues for vehicle sharing
Roles	<i>Transportation Providers:</i> Look into vehicle insurance pools <i>Human Services Transportation Committee:</i> establish ideas and possibilities for billing, insurance, and liability solutions <i>HSTP Coordinators:</i> Source of information of what has occurred that has encourages resource sharing.
Timeframe	Ongoing
Priority	Low
Cost	Cost of running vehicles
Funding Sources	Section 5310
Considerations	By sharing vehicles and overhead costs, new routes could possibly be established with shared cost lowering risk for both transportation providers. Service providers have indicated that most providers are open to the idea given that liability and insurance issues would have to be resolved. For smaller providers who may have only 1 or 2 vehicles, a maintenance issue might result in the loss of services and possibly sharing.

Cost Gap

Gap: *Lack of funding to provide low cost service to unserved, underserved and served areas while keeping costs low for both riders and providers*

Goal: *Keep fares affordable while maintaining provider solvency*

Strategy: *Continue to apply for funding opportunities while decreasing expenses through coordination efforts with neighboring providers*

Low income populations and other groups may not have the resources to find adequate transportation services. There are many categories of low-income groups including fixed income, single mothers, unemployed and others. By keeping fares affordable these groups, which are often not covered by funding programs, including Medicaid, may be able to better manage their transportation needs. Some providers indicated that existing funding levels were not adequate, and that as a result they have had to decline requests for service because of lack of available resources. While nearly all of Region 11 is covered by one or more service providers, that doesn't necessarily mean that these providers are able to meet all demands. While ideally more money for transportation will be made available in the future, providers must plan to become more efficient in order to reduce costs per trip.

Education Gaps

Gap: *Lack of knowledge, by the general public, of available transportation services*

Goal: *Raise awareness of transit services and increase ridership*

Strategy: *Increase outreach through better use of media outlets, increase shuttle service, construct new & utilize already established transfer stations*

While public transportation has been around for many years, many people in rural communities are still of the mindset that the buses they see traveling daily on their streets are for senior citizens, people with disabilities, etc. They are not aware of the affordable service that is available to them. Through public education, more people would be made aware of the benefits from using public transportation while increasing service dollars to the transit provider.

Gap: *Lack of knowledge of available assistance to specialty groups or riders with disabilities*

Goal: *Increase awareness of complimentary ADA services*

Strategy: *Brochures, flyers on buses, mailings to residents, use of media\advertising, interagency meetings, speaking engagements, and health\resource fair information booths could all be used to raise awareness.*

Specialty groups or people with varying degrees of disabilities may need &\or require a personal assistant to travel with them. Some may only need a slight amount of help boarding, riding or disembarking a transit vehicle. Transit providers have an obligation, under the Americans with Disabilities Act, to accommodate riders while providing safe travel for all. Complimentary services should be made known to these groups and provided in a rider handbook.

Gap: *Lack of information provided to human service agencies on ability to provide public transportation*

Goal: *Increase transportation responsibilities of 5310 CVP recipients*

Strategy: *Continued discussion of transportation service responsibilities at HSTP meetings and the HSTP Coordinator will work with human service agencies on how to provide services that could benefit the agency and the communities they serve.*

All recipients of 5310 Consolidated Vehicle Procurement program funds have received vehicles to provide transportation services. Human service agencies have been awarded vehicles due to the fact that some clients of their respective agency may have difficulty riding with the general public. IDOT\DPIT has stated that these agencies can provide transportation to the general public and charge a fare that would reasonably cover the costs of such trips. This can be viewed as a good coordination effort and a way to raise money for the agency.

Geographic Gaps

Gap: *Lack of general public transportation services in rural St. Clair County*

Goal: *Acquire adequate funding for expansion service in the rural area*

Strategy: *Advocate for funding*

St. Clair County currently has fixed route service in urbanized areas, considered part of the St. Louis Metropolitan area, provided by the public provider, St. Clair County Transit District (SCCTD) and paratransit services for eligible citizens provided by the non-profit Alternative Transportation System (ATS). This Gap affects the sparsely populated rural area of the county which does not have access to either the fixed route or a demand response system. There is a need for greater coordination of all the providers within St. Clair County and the presence of a 5311 or DOAP provider to serve populations outside of the urbanized St. Louis Metropolitan area. The breakdown for rural and urban is not available, but roughly 39,000 people (approx. 1/3 of those employed) from St. Clair county commute to Madison County or across the Mississippi River into St. Louis. It is also likely that high numbers of individuals living in rural St. Clair County commute into the urbanized portions of the county.

Service Provision Gaps

Gap: *Lack of employment related shuttles*

Goal: *Identify need and increase shuttles that accommodate employment of all shifts*

Strategy: *Identify high volume employment hubs, communicate with local employers to assess transportation needs of employees or potential employees, use information of any new employers as a planning tool*

In Region 11 there is specific data that encourages the need for shuttles. For example, Monroe County census data shows that 14,392 residents of the county are employed, with only 7,535

jobs in the county. While 5,367 Monroe County residents work within Monroe County, over 8,200 residents work outside the county. In Randolph County, nearly 2,300 residents commute to the St. Louis region each day.

Develop Job Access Transportation	
Action	Transportation providers are encouraged to find projects which could potentially utilize shuttle service
Roles	<i>Transportation Providers:</i> Research community, possible new projects/contracts. <i>Human Services Transportation Committee:</i> Provide information of local communities employment opportunities and possible transportation needs <i>HSTP Coordinators:</i> Provide knowledge and assistance with the process
Timeframe	Ongoing
Priority	High
Cost	Depends on projects
Funding Sources	5311
Considerations	Section 5311 funds may be used for funding new job access programs in rural areas. Funding increases would probably be needed to expand existing services to cover evening or weekend hours, allowing for job access by those who work nontraditional hours.

Efficiency Gaps

Gap: *Lack of affordable technology that may increase efficiency for human service 5310 transport providers*

Goal: *Increase level of efficiency through implementing Intelligent Transportation Systems (ITS)*

Strategy: *Seek funding to implement ITS, possible multi-agency grant applications to increase funding opportunities, and coordinated compatible software systems to be used as one system if desired.*

Often one of the first questions asked during the formation of a new public transit system is if the funding is going to continue. Such concerns are not unfounded. Government grants and agency funding do face challenges in light of record deficits in both state and federal budgets. However, the need for transportation is recognized and funding sources have been, so far, stable. There is still a need to increase the efficiency of currently operated systems in order to ensure the continuation of these services into the future. Coordination and sharing of services is the first leg of creating greater efficiency. New efforts including Intelligent Transportation Systems (ITS) have been shown to increase efficiency in several ways as well as increase opportunities for coordination.

Investment in Communication Technology	
Action	Service providers should be encouraged to review their own need for increased technology, and also to consult other area providers to determine if a joint project might be warranted.
Roles	<p>Transportation Providers: Identify needs; work with other providers to ensure that systems are compatible.</p> <p>Human Services Transportation Committee: Communicate service needs to committee members</p> <p>HSTP Coordinators: Act as a resource</p>
Timeframe	Depends on individual need and ability to access funds.
Priority	Moderate
Cost	Depends on individual provider
Funding Sources	Funds could come from Section 5311, DOAP, or other funding streams.
Considerations	Inefficiencies in transportation are a major barrier to increased services. Labor costs associated with scheduling trips takes away dollars that could be invested in rolling stock or drivers. Improved communication systems between vehicles and dispatching centers, along with communication between providers would enable the more efficient operation of existing services. Agencies wishing to invest in ITS systems or other new technologies should be aware of what systems other agencies use, and should study the possibility of either sharing the costs associated with these systems or ensure that the systems are compatible so that future coordination is possible.

Gap: Documented unnecessary dead head miles and identified duplication in services

Goal: Decrease dead head miles and duplication in services if any arise in the future

Strategy: Coordinate long distance trips with neighboring providers and develop transfer stations

In efforts to reduce dead head miles it is imperative to coordinate long distance rides with neighboring transportation providers. One way this can be accomplished is by implementing transfer stations to reduce the trip length. Efforts with DHS and IDOT must be a priority to achieve this goal specifically for medical transportation (see below). Also, service contracts for one provider to meet billing requirements from DHS would create a solution for some deadhead miles.

Medical Transportation Gaps

Gap: Lack of transportation options for non-emergency transportation

Goal: Increase non-emergency transportation trips and educate the public of potential options

Strategy: Education and coordination with ambulance companies, hospitals and insurance companies, increase rides home for patients brought to hospitals in ambulances, and obtain non-emergency stretcher vehicles

The need to increase transportation for medical trips is one of the most widely and often discussed topics at this region's HSTC meetings and is a most dire need for some transit disadvantaged individuals. As one of the largest urban centers in the United States, St. Louis has specialized health care centers and transportation facilities that cannot be found elsewhere in Southern Illinois. One approach to this matter would be advocacy for legislative changes in Medicaid rules to pay transit providers.

Gap: Lack of routes to urbanized areas and along major corridors where medical facilities are located

Goal: Increase and coordinate routes to metro St. Louis and along major commercial corridors

Strategy: Expand service to these areas by increased funding options and coordination with medical facilities

The demand for transportation into St. Louis extends beyond counties that border the St. Louis Metro Area. Many transportation providers also have discussed the need for transportation into St. Louis from other parts of the region. Providers in the southern and eastern counties of the region have indicated that there is demand (and in many cases, such as medical appointments, a genuine need) for transportation into the St. Louis region. There are high costs associated with completing these trips, and many feel that at the present time it is a misallocation of resources. Also, corridors are home to many hotels, restaurants, services, large retailers, specialty shops, medical centers, government facilities and entertainment options. Transportation to and from these commercial centers would greatly impact the economic growth of the region as well as quality of life for the residents.

Identification of Duplication in Services

Along with identifying gaps in service, a coordinated transportation plan should take into account where services may be duplicated. Coordination is about maximizing the use of resources.

The most obvious examples of duplicated services are where two agencies are serving the same clients along similar lines. Within Region 11 there are no blatant instances of service

duplication, no agencies are in direct competition with one another. Duplication of services can also mean instances where publically funded vehicles are operating in the same area and there is an opportunity to combine trips. This can include instances where multiple providers are traveling outside their primary service area along a similar route or where public and private providers are operating along similar lines.

Duplicated services can fall into the following three categories:

1. Instances where providers are competing to serve the same population: The most blatant type of service duplication, where publically funded vehicles are operating in competition with one another for clients. *Examples within Region 11: None*

2. Instances where multiple providers are serving different populations in the same geographic area: Simply because two providers operate in the same area doesn't necessarily mean that there is a duplicated service, but it does mean that providers should be mindful of potential opportunities to combine trips. In order to be considered for funding, providers should show that they are willing to share rides where possible, and providers should continuously evaluate their transportation to ensure that maximum use of both their own budgets, and public transportation dollars in general.

3. Instances where providers bring clients from different geographic areas to similar destinations or travel along similar routes: In some instances, agencies might receive vehicles or funding to serve clients in separate geographic areas, but because of demand certain trips might overlap with service provided by other providers. *Examples within Region 11:*

- Providers and Human services agencies have frequently brought up the high demand for transportation into the St. Louis Metro Area, and all providers surveyed have indicated that they either travel to St. Louis or have demand for trips to St. Louis metro area.
- Most providers in Region 11 also have a demand for transportation into the Carbondale/Marion area.
- Some demand also exists for trips into Paducah, KY and Cape Girardeau, MO

Tabular Analysis of Region 11

Below is a graphical analysis of each provider's territories. The dark grey squares are the provider's regular territories and the blue square indicate counties the providers are traveling to, but are not a part of their regular routes.

Table of Transportation Providers by County in Region 11	Alexander	Franklin	Jackson	Jefferson	Johnson	Massac	Monroe	Perry	Pulaski	Randolph	St. Clair	Union	Washington	Williamson	Notes
Shawnee MTD															Public transit provider
South Central Transit															Public transit provider with service ext.'s in St. Clair, Jackson, & Williamson Co.'s
St. Clair Co. Transit															
Jackson County MTD															
Rides Mass Transit District															
Monroe/Randolph MTD															Public transit provider
Bethany Place															
Challenge Unlimited															Also cover Madison Co. in Region 9
Comprehensive Connections															Sr. & disabled client transport
Epilepsy Foundation of Greater Southern Il.															Provides transportation to clients for medical services
Five Star Industries, Inc.															
Foundation for Autism Services Today & Tomorrow (FASTT)															Client based transportation also serving Madison Co. & surrounding areas
Gold Plate Sr. Program															Sr. transportation in Perry & north Jackson Co.'s
Human Service Center															Disabled client based transportation
Human Support Services															
Il Center for Autism															
Millstadt Township Sr. Services															
Rotary Club of O'Fallon															Elderly & disabled transportation in O'Fallon city & township & limited areas of Caseyville
SAVE, Inc.															Client based transportation in St. Clair Co. & parts of Madison & Monroe Co.'s
Senior Adult Services															Senior transportation
Senior Services of Southern St. Clair Co.															Sr. transportation limited to Marissa Township in Southern St. Clair Co.
Touchette Regional Hospital															Medical transport\patient based services
United Methodist Children's Home															Also covers Marion Co. as well as other counties throughout the State
Washington Co. Senior Services															
Total Public	1	1	4	1	1	1	1	1	1	2	6	1	1	3	

<i>Total Disabled &/or Adult Day Services</i>	0	0	0	2	0	0	5	1	0	4	7	0	3	0

<i>Total Providers</i>	1	1	4	3	1	1	6	3	1	5	17	1	4	3

Program of Projects

The Regional Program of Projects is a list of projects which embrace the policies and strategies laid out in this document and have been recommended for funding by the Regional Human Services Transportation Committee.

5310 Consolidated Vehicle Procurement Program (CVP) –Through the Consolidated Vehicle Procurement Program (CVP), the Illinois Department of Transportation - Division of Public & Intermodal Transportation (IDOT-DPIT) makes grants to municipalities, mass transit districts, counties, and private non-profit organizations for ramp and lift equipped paratransit vehicles. Funding for these grants comes from varied sources, including the Federal Transit Administrations (FTA) Section 5309, 5310, 5311, 5316, and 5317 programs, as well as state resources. Previously, agencies eligible for different grants were required to submit numerous applications. The consolidated vehicle procurement application was developed to make it easier for agencies to apply for funds and for the IDOT-DPIT to review projects in applications. As part of the Federal government’s human services coordination initiative, all Section 5310 recipients must certify that projects are derived from a locally developed, coordinated public transit-human services transportation plan (HSTP). In the rural areas of Illinois, IDOT-DPIT has developed 11 regions each staffed with an HSTP Regional Coordinator. In the urban downstate areas the Metropolitan Planning Organization (MPO) is the HSTP agency, and in the Northeastern IL region (six counties) the contact is the Regional Transportation Authority (RTA). All Section 5310 applicants should be actively involved in the development of these plans, and each Section 5310 application will need to be endorsed by their respective HSTP local transportation planning committee in order to be considered for funding by IDOT-DPIT. In order to meet the federal coordination requirements identified above, all Section 5310 applicants will now submit their application to their local HSTP office for initial review. While the applications will not be formally scored by the HSTP offices, that will continue to be done by IDOT-DPIT, the role of the HSTP offices will be to ensure that the agency submitting the application has been an active player in the local service coordination process and that the services provided by the application meet the service needs and goals as identified in locally derived HSTP plan.

When final review of the application is complete, IDOT-DPIT will make its recommendation to the Governor. Following his approval, vehicles will be ordered and grant contracts forwarded to the applicants for signature. When both copies are returned, the agreement will be executed and dated at IDOT-DPIT. Only then can IDOT-DPIT deliver vehicles. IDOT-DPIT, on behalf of the grantees, develops the vehicle specifications, purchases the vehicles, and assures that the procurement conforms to all state and federal requirements. This constitutes the Consolidated Vehicle Procurement process.

Inter-City Bus-Section 5311 of the Federal Transit Act, as amended, authorizes the Secretary of Transportation to apportion funds to the Governor of each state for public transportation projects in non-urbanized areas. The goals of the Section 5311 Programs are: to enhance the access of people in non-urbanized areas to healthcare, shopping, education, employment, public services and recreation; to assist in the maintenance, development, improvement, and use of public transportation systems in rural and small urban areas; and to encourage and facilitate the most efficient use of all Federal funds used to provide passenger transportation in non-urbanized areas through the coordination of programs and services.

Under Section 5311 (i) which was authorized by the ISTEA, states are required to spend a portion of their Section 5311 apportionment to carry out a program for the development and support of intercity bus transportation. The federal objectives of the funding intercity bus service under Section 5311 are: support the connection between non-urbanized areas and the larger regional or national system of intercity bus service; meet the intercity travel needs of residents in non-urbanized areas; and support the infrastructure of the intercity bus network through planning and marketing assistance and capital investment in facilities.

Appendices
